

CWEN Pure Play On U.S. De-Carbonization Trend

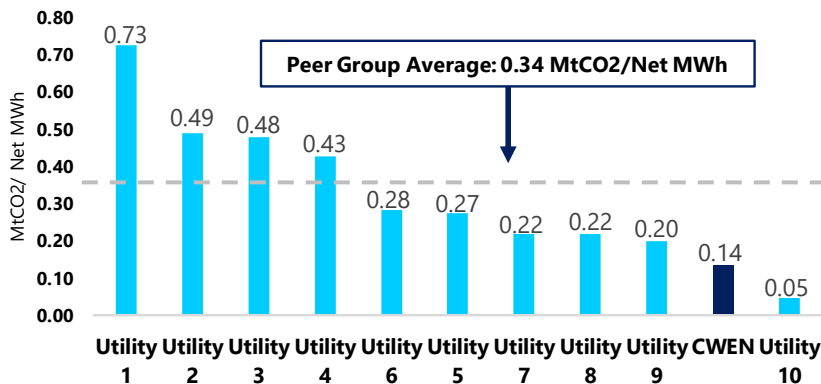

Low Carbon Operational Footprint

- **84% of electricity MWh from renewables¹**
- **4.7 million metric tons of CO2 avoided²**
- **1.1 million metric tons of CO2³**
 - Scope 1 Emissions from operating assets

Safety: Key Goal for Management Performance

- **Safety performance goals part of annual incentive compensation plan for management**
- **Zero fatalities in 2019**
- **COVID-19: Safety response plans implemented**

Top Tier in Emissions Intensity⁴

- 100% of sponsor's ~ 9 GW development pipeline consists of zero-emissions renewables

Green Financings

- **\$1.1 billion of corporate green bonds issued to date**
- **Aligned with Green Bond Principles 2018 and reviewed by Sustainalytics**

Peer Leading Low-Carbon Portfolio With Management Alignment On Safety Performance

¹ Based on electricity MWh reported in 2019 CWEN 10-K; volumes do not include the MWh generated/sold by the Company's equity method investments; ² Emissions avoided calculation based on U.S. EPA Greenhouse Gas Equivalencies Calculator as of May 2020 using MWh of renewable generation reported in 2019 CWEN 10-K; ³ Based on data reported to the EPA and various federal/state agencies; ⁴ Power sector peers based on largest components of the Dow Jones Utility Index as measured by weighting in Index; peers include AEP, SO, XEL, DUK, D, ED, PEG, SRE, NEE, EXC; carbon intensity based on peer company reported data on carbon emissions and generation from owned assets; XEL's carbon intensity includes purchased power emissions
